

L^AT_EX-Changelog

jc: Jan Chrin; vrws: Volker RW Schaa; zc: Zhichu Chen;

1 Changes 2026

1.1 v3.00-2026/02/10

vrws: The changes consist of dividing the JACoW class (version v2.99c-2026/02/07) into bibliography and citation styles, as well as providing short templates for a proceedings paper with different treatments of bibliographies. In addition, a style guide has been provided with recommendations for good scientific writing, how to typeset unit, isotopes and elements, and much more...

Class — Split of combined class file into `.cls`, `.bbx`, and `.cbx`

- **jacow.cls** JACoW class file (v3.00-2026/02/10)
- **jacow.bbx** JACoW's biblatex bibliography style (v0.01-2024/03/21)
- **jacow.cbx** JACoW's biblatex cite style (v0.01-2024/03/21)

Template — reducing the *n*-page template to a short example, listing the key features of the JACoW class and providing a BibL^AT_EX version of it

- **jacow_latex_template.tex** templates source and PDF to demonstrate the use of basic functionality
- **jacow_latex_template.pdf** PDF of template
- **jacow_latex_template_bib.tex** templates source as above but using BibL^AT_EX
- **jacow_latex_template_bib.pdf** PDF of the template using BibL^AT_EX
- **jacow_latex_template_bib.bib** bib file for use with the BibL^AT_EX template
- **jacow_pagesize.png** schematic of the JACoW page size
(used in the **Template** and in the **L^AT_EX Style Guide**)
- **jacow_picture1.png** example picture for graphics inclusion
- **jacow_picture2.png** example picture for graphics inclusion

L^AT_EX Style Guide — detailed guide with recommendations for good scientific writing, how to typeset unit, isotopes and elements, and much more...

- **jacow_latex_style_guide.tex** source file for style guide (v.2026-02-23)
- **jacow_latex_style_guide.pdf** PDF of template »jacow_latex_style_guide.tex« together with following two Appendices (Appendix A and Appendix C)
- **jacow_latex_appendix_a.tex** **Appendix A** Formatting of Authors and Affiliations: showing the different ways of author and affiliation
- **jacow_latex_appendix_a.pdf** PDF of »jacow_latex_appendix_a.tex«, this PDF is included in the main Style Guide
- **jacow_latex_appendix_c.pdf** **Appendix C** Journal Abbreviations: contains a list of journal abbreviation according to ISO 4. This file is part of the **JACoW Word Style Guide** and the PDF is included in the L^AT_EX Style Guide. There is no companion »`.tex`« file.
- **jacow_groupphoto_tm2025.jpg** group photo of the participants of the JACoW Team Meeting November 2025 at CERN in Geneva, Switzerland.

1.2 v2.99c-2026/02/07

- **vrws:** define linkcolor to be the same as in JACoW's Word template RGB=(21.2,37.3,56.9)

1.3 v2.99b-2026/02/05

- **vrws:** authbkl package with JACoW settings introduced, providing macros for superscripting the author/affiliation block using `\author[<number>]{<name>}` and `\affil[<number>]{<affiliation>}`

1.4 v2.99a-2026/01/02

- **vrws:** missing `\dblfloatsep` and `\dbltextfloatsep` for twocolumn introduced (in v2.98q-2025/06/05 tighter vertical spacing surrounding tables and figures like in Word was introduced, but the settings for floats in double column width remained with standard values).

2 Changes 2025

2.1 v2.98q-2025/06/05

- **vrws:** vertical spacing modifications from v2.18-2023/10/15, which brought tighter vertical spacing surrounding tables and figures, were adapted to the Word practice of leaving no space. The changes affected the following parameters `\intextsep`, `\textfloatsep`, `\floatsep`, `\abovecaptionskip`, and `\belowcaptionskip`.

2.2 v2.98p-2025/05/26

- **vrws:** the “et al.” string in “IEEEtran” version v1.4e 2025/03/15 (which is loaded as base scheme with `[bibstyle=ieee]biblatex` package) shows up as “*etal.*”, today's version corrects it back to “*et al.*”

2.3 v2.98o-2025/01/16

- **vrws:** “IEEEtran” style file has been changed in version v1.4c 2025/01/15 to typeset “et al.” in an upright font. `jacow.cls` stays with the old definition and redefines it

3 Changes 2024

3.1 v2.98n-2024/09/18

- **vrws:** `[utf8]inputenc` moved from template to class so that it appears for pdfLaTeX before biblatex is loaded

3.2 v2.98m-2024/09/11

- **vrws:** change of sequence of graphics extension to be embedded for XeTeX (EPS came to early). This code part was removed from the template and incorporated in the class file
- **vrws:** glue amount modification of `\textfloatsep` and `\intextsep` back to a bigger minus values

3.3 v2.98l-2024/09/08

- **zc:** code stolen from `cite.sty` to mimic the behavior of `cite` package in respect of spacing between numbers: `[1,3,7]` (`␣`: `\multicitedelim`)

3.4 v2.98k-2024/09/07

- **zc:** fix introduced to remove period after URL which showed up with v2.98f

3.5 v2.98j-2024/08/20

- `vrws`: "shortjournal" introduced which has »*Journal Name*« abbreviated as to the official version used by, e.g., <https://woodward.library.ubc.ca/woodward/research-help/journal-abbreviations/>
- `zc`: field formatting unified/redefined for `@article`, `@periodical`, `@inproceedings` (volume, issue, number, journaltitle, shortjournal, maintitle, booktitle)

3.6 v2.98h-2024/08/19

- `vrws+zc+jc`: `@inproceedings`: this version distinguishes between "eventdate" (conferences date) and "date/year/month" (publication date) for JACoW standard
if "eventdate" is present, "date..." is ignored;
..., venue [,eventdate | if defined] [,eid | if doi undefined] [,pages | if defined] [,date | if \texttt{eventdate} undefined]. [doi | if defined] ...

3.7 v2.98g-2024/08/18

- `zc`: `\DeclareFieldFormat` now included for booktitle

3.8 v2.98f-2024/08/17

- `zc`: redefinition of `@inproceedings`
- `zc`: date macro only shows month and year now from "eventdate"/"date"
- `zc`: `hyperref` workaround for not correctly escaped colon
- `zc`: add a macro `\doi` to be used inside "thebibliography" environment which measures the remaining space on the current line and introduces a line break to prevent hyphenating of DOIs

3.9 v2.98e-2024/08/16

`vrws+zc`: bug fix for BibLaTeX option (`\AtBeginBibliography` not recognized outside) `vrws+zc`: options for main font now set in `\defaultfontfeatures` `vrws`: document internal links introduced due to defaults of `hyperref` in v.2.98, now switch off
